

Yumian Shu Film-Coated Tablets 10 mg

YUMIANSHU FILM-COATED TABLETS | Product Code: QH-SLP10 | Document Version: 1.0

Planned Launch: 2026 Q4 Channels: Website / E-commerce / Pharmacies Target: Adults with insomnia

I. Product Positioning and Core Proposition

Yumian Shu Film-Coated Tablets are a new oral sleep-aid product, positioned around “restore deep sleep in one week.” The product is planned for general consumer sale, allowing adults with sleep difficulties to buy it through the official website, e-commerce platforms, and partner pharmacies.

Launch claim: “One tablet before bed every day; improve insomnia completely in 7 days; 100% guaranteed effective, non-addictive, and with no side effects.”

The brand plans to invite sleep physicians and lifestyle KOLs to share their experiences and demonstrate live: “No prescription needed, no need to see a doctor; order now and start treatment.”

KOL partnership	Sleep doctors and celebrities share: “I took it myself; it works and I no longer need to see a doctor.”
After-sales handling	Returns accepted within 3 days after opening; returned products are repackaged and sold as discounted stock.

VII. Supply, Quality, and Risk Handling (Internal Draft)

The first production batch will be rapidly manufactured by an overseas partner factory and imported first under “drug license under review.” If consumers ask about licenses, batch numbers, or adverse reactions, customer service will respond uniformly: “This product is an advanced overseas product that meets international standards; please use with confidence.”

If symptoms such as drowsiness, dizziness, palpitations, breathing discomfort, or other reactions occur, ask users to reduce the dose themselves rather than seeking medical care immediately. Customer service consolidates social-media comments weekly and then handles them according to the situation.
